DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C 121:
 - I. Claims 1-25 are drawn to an optimizing system, classified in class 707, subclass 1.
 - II. Claims 26-31 are drawn to pattern matching, classified in class 707, subclass 6.
 - III. Claims 32-36 are drawn to manipulating a data structure, classified in class 707, subclass 101.
2. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable.

In the instant case invention I (optimizing systems) has separate utility such as look up engines. Invention II (pattern matching systems) has separate utility such as conditional data matching. And invention III (manipulating a data structure) has separate utility such as preprocessing entries.
3. Because these inventions are distinct and search Groups I, II and III are not required to be simultaneous, restriction for examining purposes as indicated is proper.
4. Examiner has attempted to conduct a telephone interview with Kenneth B. Leffler on December 6, 2004 but could not be reached.

Art Unit: 2161

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
